### What do they do?

Inclusion Scotland (IS) is a consortium of disability organisations, individual disabled people and social partners who share our aims. We work towards eradicating the barriers – physical, economic, cultural and attitudinal – which prevent disabled people being fully included in society.

Our role is to enable meaningful communication and consultation between disabled people in Scotland and policy makers at local and national government levels and with bodies such as the NHS, all of whose decisions and policies can profoundly affect us. We want to reverse, through civil dialogue, partnerships, capacity building, education, persuasion, training and advocacy, the current social exclusion experienced by disabled people.

In IS we share the ethos of the social model of disability as opposed to the medical model, which expects disabled people to regard their impairment as their problem and adapt to fit into the world as it is. The social model of disability, however, recognises everyone as equal and looks beyond a person's impairment at all the relevant factors including the barriers that affect their ability to be a full and equal participant in society.
